# SYCHEMAIR Air Shower

SYCHEM AIR

Our high efficiency air shower offers an outstanding level of particle removal ensuring protection for your animals, staff and Biomedical research.

### Why choose SychemAir?

Air shower chambers are used to remove dust, dander, and allergens from the operator. It is a self contained unit that utilises high efficiency air flow to effectively remove all types of contaminants from every individual, reducing their contamination level before passing into a lower contamination area. SychemAIR features a compact design, a customisable layout, easy maintenance and a flat-pack delivery option.

### **AirFlow Range**

SychemAIR is part of our Airflow Range, a collection of five systems that also includes: a dual access change station, a free flow bedding dispenser, a bedding disposal unit and a class 2 microbiological safety cabinet.

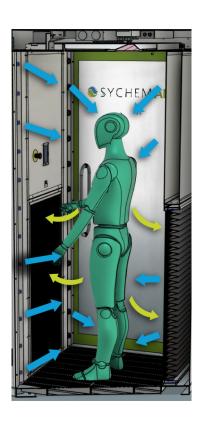

- Active Airflow TechnologyParticle Removal Excellence
- Three Levels of Filtration

## **Active Airflow Technology**

Our nozzles are designed to efficiently blow air from various angles, into the centre of the chamber. With an air velocity of 25 m/s (82 ft/s), SychemAIR competes with current market leaders. SychemAIR utilises multiple fans in strategic locations, allowing for redundant airflow, and increasing the unit's reliability.

#### **Particle Removal Excellence**

SychemAIR is equipped with a total of 48 air nozzles, creating an enveloping airflow. The nozzles are located in opposing corners and are angled towards the direction of the occupant, enabling optimal particle removal.

### **Easy Maintance**

A full body in stainless steel, designed for easier cleanability, long duration, and better resistance to scratches. SychemAIR is designed to be customer maintainable. It is maintained entirely from within the air shower. The floor is easily removable, enabling the user to vacuum away any dirt and dust.

### **User-friendly Design**

SychemAIR is user-friendly, and easy to operate. The whole particle removal process is completed in less than a minute, starting from pressing the door release button, through to stepping out into the clean side. This efficient set-up optimises staff entry time into a lower contamination level environment.

## **Easy Installation Options**

SychemAIR can be ordered as pre-built, or in a flat-pack configuration, for easy installation in limited access facilities. Our flat-pack solution offers flexible installation options to best suit your facility's needs.

#### Customisable Solutions

SychemAIR is available as a straight through passage, angle passage, and T passage (with 3 doors).

The chamber size can also be elongated as a straight through air shower corridor. The overall height can be adjusted for your facility's requirements.

### **Increased Security**

SychemAIR features 3 safety stop push buttons, 1 internal and 2 external. This allows the machine to be stopped at any point of use. Each door has 2 magnet locks to prevent premature door opening, securing the airflow while the cycle is running.
