

# REVOLYZER - The efficient activity wheel system

## Efficient

48 cages with running wheels in one unit on one square meter

## User friendly

- analyzing equipment completely outside the cages
- exchange of running wheel and cage is done within seconds
- running wheels can be easily cleaned
- large touch screen

## Animal-welfare-dedicated

A running wheel is cage enrichment of high value. In contrast to other systems, the REVOLYZER avoids injuries to the mice. Voluntary running analysis serves of early detection of pain, suffering, distress or harm on the base of objective data.

## Developed by scientists for scientists

## Robust

- racks are made of stainless steel
- maintenance free except running wheels and cages
- running wheels are dishwasher-proof, bite resistant and well accepted by the animals

## Flexible

- individually produced
- demands of customers are immediately realized

## Accurate

- high sampling rate
- precision ball bearings and magnetic brakes ensure constant running conditions
